

QUALITY POLICY

SOLAR PHILIPPINES MODULE MANUFACTURING CORPORATION

We assemble quality and reliable solar modules that are best-in-class.

This will be achieved by:

- Installing an internationally-recognized production quality system
- Applying well-structured process controls
- Utilizing mature and stable technologies
- Selecting the best materials in the market
- Using top-of-the-line equipment with advanced automation
- Performing qualification and extensive reliability testing of materials and modules
- Committing to satisfy all applicable requirements

We shall excel in product quality and reliability, operations productivity and manufacturing cycle time while achieving the most competitive cost.

Everyone in the corporation is fully committed to continual improvement for best-in-class module manufacturing.
